

## **Beaver Meadows Tube Hill Safety**

**Welcome to Beaver Meadows Resort Ranch Snow Tubing! You are in for a day of epic winter adventures!**

**You will walk across two bridges to the base of the lift. There you will find the Tube Shack. We have single and double tubes. The single tubes are for the mild runs because they tend to spin more. Double tubes can be used on any run in the park. You may switch out tubes as often as you like. Just remember to bring your tube back to the Tube Shack after every run.**

**For our smaller riders, we have cushions that can go in the tubes. Just request one at the Tube Shack and our staff will be happy to provide one.**

**The “leash” or tow strap is for the lift and to help you pull your tube along and is the front of the tube. Hand the tow strap to the lift attendant, turn and sit in the tube with feet down hill as you go up the lift backwards. Weight will always be distributed towards the tow strap. At the top, a lift attendant will unhook you and then you pick out your run.**

**Please ask the lift staff for recommendations as the conditions on the hill can change throughout the day. They will also tell you which runs you can link tubes in a daisy chain or ride Superman style! Superman style consists of a solo rider on a double tube on their stomach, face first, holding on with both hands. The lift staff will assist groups in setting up daisy chains properly.**

**When you are ready to slide down the run, place the tow strap or “leash” completely inside the tube and sit over top of it with that end facing downhill. Front riders must keep their feet up and toes together. The rider in the rear tube places their feet under the arms of the front rider. ALL riders must raise their bums off the bottom of the tube and hold on to BOTH handles at all times until the tube stops. No selfies on the hill. You may ask staff to assist you with pictures and videos and they will do their best to assist you. Keep all valuable items in a zipper pocket or a locked vehicle! Items lost on the Tube Hill may not surface until Spring, if at all.**

**Remember that the BMRR Staff, Safety Monitors, EMTS and Lift Attendants are there to help you have fun and to keep you safe. Please do not hesitate to ask them questions and comply with their instructions at all times.**

**Beaver Meadows Resort Ranch Tube Hill is the oldest tubing hill in Colorado and it is the best because it boasts the most exciting runs you will find anywhere! Our runs have steep and fast starts, banked curves and huge jumps! Come and try our legendary runs like the Beaver Plunge, Dead man's Drop, Lighting and Thunder! We also have more gentle runs for the faint of heart. No matter which of our 12 runs you decide to enjoy, safety is our priority so you must obey the instructions of staff at all times.**
